Early History
The Yazoo, Natchez, Biloxi, Choctaw, Chickasaw, Houma, Ofo, Quapaw, and Tunica tribes were indigenous inhabitants of the area when European colonists arrived. The Chickasaw and the Choctaw were closely related. They both spoke the Muskogean language and were later considered part of the "Five Civilized Tribes." The Natchez lived in the southwest region of Mississippi. They were mostly fisherman and farmers.

European colonists began settling the area in 1699 when the French established Fort Maurepas on Biloxi Bay, Mississippi. After the French and Indian War (Seven Years' War), the French surrendered the Mississippi area to Britain in 1763. Twenty years later, Britain ceded the Gulf Coast area to Spain and the rest of the region was claimed by Georgia.

European colonists imported African slaves as laborers. Under French and Spanish rule, a class of free people of color developed. These were mostly multiracial descendants of European men and enslaved women, and their children. Often the European men would help their multiracial children get educated or have apprenticeships for trades. Sometimes the colonists gave property to their multiracial children; sometimes they freed the enslaved mothers and their children. Some free people of color became artisans or educated merchants and property owners. The largest community of free multiracial citizens was in New Orleans.

In 1789, the Georgia legislature authorized the sale of Yazoo Indian lands. Hundreds of white settlers moved from the southern Atlantic Coast states to the Mississippi area between 1789 and 1794.

The U. S. Congress organized the Mississippi Territory 7 April 1798. Georgia abandoned claims to the northern portion of the Mississippi Territory in 1802. The U.S. government acquired the Gulf Coast portion from Spain during the War of 1812. In 1817, the U.S. Government organized the eastern part of the Mississippi Territory as the Territory of Alabama. On December 10, 1817, Mississippi became the 20th state in the Union with David Holmes elected the first governor.

Plantations were developed primarily along the rivers, where waterfront gave them access to the major transportation routes. This is also where early towns developed, linked by the steamboats that carried commercial products and crops to markets. The backcountry remained a largely undeveloped frontier.

Between 1805 and 1832, the Choctaw and Chickasaw tribes ceded millions of acres of their lands to the U. S. Federal Government. Members of the Choctaw tribe were removed to land in what is now the state of Oklahoma. However, there are still a few thousand Choctaws living in east central Mississippi.

The lands obtained from the Native Americans were settled mostly by European citizens from other Southern states. Many were slaveholders who brought slaves with them or purchased them through the internal slave market, especially in New Orleans.

Nearly one million slaves were sold and sent to the Deep South, including Mississippi, by planters in Virginia and Maryland when poor farming methods caused lowered production of tobacco. The sale of their unneeded slaves to other areas broke up many slave families. The landowners of the Deep South imposed their harsher slave laws and restricted the rights of free blacks.

During the 1850s, Mississippi cotton plantation owners—especially those of the Delta and Black Belt regions—became wealthy due to the high fertility of the soil, the high price of cotton on the international market, and cheap slave labor. The planters' dependence on slaves for labor and the severe wealth imbalances among whites played strong roles both in state politics and in planters' support for secession. Mississippi seceded from the Union in 1861. More than 80,000 Mississippians fought in the Civil War; their casualties were extremely heavy. During the war,
Union and Confederate forces struggled over dominance on the Mississippi River, critical to supply routes and commerce. After the Civil War, reconstruction forced new laws in Mississippi which gave more equality in land ownership, voting rights, etc., to former slaves and to poor white people. These groups began farming the unoccupied land in the Mississippi Delta. In time, there were more small farmers than large plantation owners. In 1870, Mississippi was readmitted to the Union. After about 20 years, wealthy white politicians in Mississippi enacted “Jim Crow” laws to regain white control of land ownership, politics, laws, and voting rights. These restrictions and the low prices for cotton caused millions of blacks and poor whites to migrate to northern U. S. cities in the 1900’s.

**Genealogical Records of Colonial Mississippians**
Records kept by the French, English, and Spanish colonial governments include censuses, birth and burial registers, and land grants. Many of these records were transcribed and published by Dunbar Rowland in “Mississippi Provincial Archives”. These manuscript volumes include records from the French Dominion (1612 – 1663), the English Dominion (1763 – 1783), and the Spanish Dominion (1757 – 1820). Find and read various volumes free online on Google Books, Internet Archive and FamilySearch Books. These books are also available at the Mississippi Department of Archives and History – [www.mdah.ms.gov](http://www.mdah.ms.gov)
