

South Dakota Genealogy Research

Indigenous Peoples and European Settlement

The Arikara peoples dominated the land now known as South Dakota when the Sioux arrived in the 1700's. The Arikara raised corn (maize), beans, squash, sunflowers, and tobacco; they used these products and traded them with other tribes for meat and processed hides.

The three main tribes of the Sioux were the Lakota, the Eastern Dakota, and the Western

Dakota. The Sioux were a nomadic people who lived in teepees and followed the bison herds.

At the time that Europeans began to explore and set up trading posts in what is now South Dakota, the people who lived there included the Sioux, the Arikara, the Cheyenne and the Ponca.

By 1700, the Sioux had driven the Ponca to the west side of the Missouri River. There the Ponca lived in the area of what is now

Sioux Falls. Smallpox decimated their numbers, and they eventually moved to what is now known as Ponca, Nebraska.

The Cheyenne people originally lived in Minnesota. In the early 1700's, they migrated west into what is now North and South Dakota. After settling the Black Hills of South Dakota, they introduced the horse culture to Lakota bands about 1730. Allied with the Arapaho, the Cheyenne pushed the Kiowa to the Southern Plains. In turn, the Cheyenne were pushed west by the more numerous Lakota tribe.

In 1743, the French explorers Francois and Louis-Joseph de La Verendrye came to what is now South Dakota and claimed it for France.

In about 1750, the Teton Sioux, having driven the Omaha from the Big Sioux and James River valleys, reached the Missouri River and engaged the Ree tribe in a forty years' war.

In 1760, other Sioux Indians who had been pushed out of Minnesota by the Chippewa reached the Missouri River. They fought with the Arikara for control of the Missouri Valley in central South Dakota for many years.

In 1775, the Oglala Teton settled the Black Hills.

In 1780, the Yankton and Yanktonais Sioux, having been driven from western Iowa by the Oto, settled in the James River Valley.

In 1785, Pierre Dorian, later a guide to Lewis and Clark, married a Yankton woman and settled in trade at the mouth of James River.

In 1792, trader Joseph Garreau settled with the Ree Indians at Little Bend of the Missouri. He became an interpreter among the Arikara and Mandan people.

In 1803, South Dakota was sold to the United States as part of the Louisiana Purchase.

In 1804, Lewis and Clark passed through the area on the Missouri River. They explored the countryside, hunted and held councils with the Yankton Sioux and with the Teton Sioux.

In 1817, Joseph La Framboise set up the first American trading post near present-day Fort Pierre on the Missouri River. Later Fort Tecumseh was built at this site.

In 1818, Hazen Mooers set up a fur trading post at the Great Bend of Big Sioux (Flandreau.)

In 1837, a smallpox epidemic on Missouri River severely reduced the population of all tribes.

Land east of the Missouri River was successively part of the Michigan, Wisconsin, and Iowa territories before finally becoming Minnesota Territory in 1849.

Land west of the Missouri River became part of the vast northern Nebraska Territory in 1854.

In 1856/57 the Dakota Land Company from Minnesota established a settlement in Medary, near the town of Brookings. At about the same time, Western Town Company from Iowa established settlements in the area along the Sioux River, including what is now Sioux Falls. In 1858, the U.S. government forced the Yankton Sioux onto a reservation in the southern part of what became Douglas County.

By 1860 white settlements were located in the southeastern part of the state and along the Missouri, Big Sioux, Vermillion, James, and Red Rivers. Settlers petitioned for territorial status. Quartzite was found and quarried as early as the 1860s in what became Minnehaha County, along the Big Sioux River.

On 2 March 1861, the U.S. Congress created Dakota Territory, which included the present states of South Dakota, North Dakota, Montana, and most of Wyoming.

By fall of 1861, 11 post offices served the territory, including Yankton, Vermillion, and Sioux Falls.

In 1862, territorial counties were established by the legislature: Lincoln, Minnehaha, Brookings, and Deuel. Ft. Dakota was established in the Sioux Falls area to protect settlers.

The Homestead Act of 1862 encouraged settlers to stake claims. Although economic depression, drought, and grasshoppers plagued the settlers, the development of land offices, railroad expansion, and changing crop conditions contributed to population growth.

In 1869, many Dakota families left the Santee Sioux Reservation in Nebraska to take homesteads on the Wakpaipaksan (bend in the river) of the Big Sioux near the abandoned town site of Flandrau. During the summer of 1870, the future Moody County was surveyed. The Dakota traveled to Vermillion to obtain their land titles. White settlers arrived in 1872, and soon the county was populated with Dakota and white settlers. In 1863 the Winnebago and Santee Sioux were moved from Minnesota to a small reservation near Fort Thompson. This later became the Crow Creek Reservation.

In 1872, the Dakota Southern Railroad began operations in South Dakota, running from Vermillion to Sioux City, Iowa. The road to Yankton was completed in 1873.

In 1874, Lt. Col. George A. Custer led an expedition that discovered gold in the Black Hills, precipitating a gold rush. The expedition violated the 1868 Treaty of Fort Laramie, which had guaranteed the Sioux rights to their sacred territory. This triggered the Black Hills War of 1876, including the Battle of the Little Big Horn in Montana. However, South Dakota opened the gold mining region and its adjacent grazing land to white settlement.

In 1878, thousands of farmers rushed for land. Settlement peaked in 1885. The rapidly growing eastern river region settlements and prosperity in the mines created pressure for statehood.

Statehood

In 1889, the U.S. Congress approved the division of the Dakota Territory into the states of North Dakota and South Dakota.

Relations between the Sioux and the white settlers continued to deteriorate. In 1890, troops with the 7th U.S. Cavalry killed more than 250 Lakota in the Wounded Knee Massacre.

The result of the wars was European ownership of land and native peoples being confined to reservations. The Cheyenne people who remained in South Dakota (northern Cheyenne) were forced onto reservations in Montana.

Federally recognized tribes now living in South Dakota include the Cheyenne River Sioux Tribal Council - Crow Creek Sioux Tribe - Flandreau Santee Sioux Tribe – Lower Brule Sioux Tribe - Oglala Sioux Tribe - Rosebud Sioux Tribe - Sisseton-Wahpeton Sioux Tribe - Yankton Sioux - Standing Rock Sioux Tribe.

Many settlers in the late 1800's came from Eastern Europe and Scandinavia. Through their perseverance and determination, they carved homes and farms out of the prairie.

In 1927, sculptor Gutzon Borglum began work on the Mount Rushmore National Memorial. In 1941, World War II caused Congress to cut off funding for completing the sculptures from head to waist.

A memorial to Lakota leader Chief Crazy Horse in the Black Hills was dedicated by sculptor Korczak Ziolkowski and by Lakota Chief Henry Standing Bear on June 3, 1948. The 87-foot head was completed in June 1998. The rest is not finished.

South Dakota Vital Records

Online Indexes

Ancestry.com – births, marriages and deaths various years

FamilySearch.org – births and marriages various years

South Dakota Birth Record Search Site – index of birth records over 100 years old filed at state

Records

Counties began recording some births, marriages and deaths in the 1800's.

In 1905, state law required counties to record all births, marriages, divorces/annulments and deaths and the state began storing birth, marriage and death records.

Obtain Records

Order copies of vital records from the **County Register of Deeds** or from the **South Dakota Department of Health Vital Records Office**.

Only birth records over 100 years old are copied for the public; but there is no time restriction on copies of marriage and death records. Specify if the copies are informational or certified.

Request “photostatic” copies; they have the most information.

South Dakota Genealogical/Historical Repositories

Center for Western Studies, Augustana University - Native Americans and Scandinavian pioneers

I.D. Weeks Library, University of South Dakota – oral history center, historical collections

South Dakota Land Records

Public Domain Land

When the United States acquired South Dakota, most land became part of the public domain. The federal government surveyed the land into plats and sold it to settlers in local land offices; the first South Dakota land office was set up at Vermillion in 1861.

Land could be obtained through cash payment (cash entries), or by homesteading (after 1862). After a settler completed the requirements for land entry, his case file was sent to the General Land Office (GLO) in Washington, DC, where a patent (first-title deed) was issued.

The local land offices recorded transactions for each section of land in tract books. They also created township plats, which are maps of land entries for each township.

Original **Federal Land Patents**, copies of the **Tract Books** and **Township Plats** are at **The Bureau of Land Management (BLM) Office** in **Billings, Montana**.

BLM **Patent Records since the 1960's** are stored at **National Archives** offices in **Denver, CO**.

Original **Homestead Papers** are stored in the **National Archives** in **Washington, D.C.**

Private Land Ownership

After a citizen bought a parcel of land from the U.S. government, the land became the private property of that person. Private land records may state the given name of the wife, a previous residence, names of children, or death information. They may give maiden names when fathers deeded property to their daughters. Witnesses may be relatives or neighbors.

Private land records are filed in the **County Clerks' or County Recordors' Offices**. As new counties were formed and boundaries changed, transactions were then recorded in the new county, while the parent county retained the records previously created.
