INSTRUCTION

cyrico training cones are constructed of polyethylene material, which is soft, flexible, non-toxic and no smell. Designed for use on any surface - grass, gravel, pavement, concrete, gym floors, cement, artificial turf and more. The flexible traffic cones can be used for an assortment of indoor and outdoor activities, such as drills training at soccer, football, basketball, games at themes parties and festive events, kids play, skating play, bicycle obstacle course, motorcycle training, race RC cars, dog training, horse training.

NOTE:

1. There is no hole on the top of sport cone to put anything in. You can punch your own holes if necessary.
2. There are four tiny holes on the corners of the base for attachment when in large field situations or windy conditions.
3. There may exist some color difference. Please refer to the actual item your
